

## CLAIMS

1. An interlayer for laminated glass,  
which is formed by laminating a plurality of layers  
5 comprising an adhesive resin, a heat ray shielding resin  
layer containing a heat ray shielding fine particle and a  
color tone compensation resin layer toned to have a color  
complementary to the color tone of the heat ray shielding  
fine particle being laminated.

10

2. The interlayer for laminated glass according to  
claim 1,  
wherein the adhesive resin is a polyvinyl acetal  
resin.

15

3. The interlayer for laminated glass according to  
claim 1 or 2,  
wherein an ultraviolet absorbing resin layer is  
further laminated.

20

4. Laminated glass,  
wherein the interlayer for laminated glass according  
to claim 1, 2 or 3 is bonded between transparent glass  
plates.
